

STATE OF OHIO

EMERGENCY ALERT SYSTEM (EAS) PLAN

DECEMBER 2018

APPROVALS

This State of Ohio Emergency Alert System (EAS) Plan was developed by the State of Ohio EAS Emergency Communications Committee, in cooperation with the National Weather Service (NWS) and the Ohio Emergency Management Agency (EMA).

GREG SAVOLDI, Chair
State Emergency Communications Committee
WNCI, State Primary

RONALD D. FORD, Vice Chair
State Emergency Communications Committee
Ohio Emergency Management Agency

JONATHON McGEE, Cable Co-Chair
State Emergency Communications Committee
Ohio Cable Telecommunications Association

LISA M. FOWLKES
Chief, Public Safety & Homeland Security Bureau
Federal Communications Commission

JOHN BORN, Director
Ohio Department of Public Safety

JACQUELINE WILLIAMS, Director
Ohio Department of Commerce

SIMA MERICK, Executive Director
Ohio Emergency Management Agency

DAVE CARWILE, Chief Technology Officer
Ohio Educational Telecommunications Network
Commission

KENNETH HAYDU, Meteorologist in Charge
National Weather Service, Wilmington, OH

GREG ARMSTRONG
WBNS, Alternate State Primary
State Emergency Communications Committee

CHRISTINE MERRITT, President
Ohio Association of Broadcasters

This Plan supersedes all previously published State EAS Plans.

DISTRIBUTION

Ohio Emergency Management Agency (EMA) (20)
All Ohio County EMA Directors
NWS Wilmington, OH
NWS Cleveland, OH
NWS Pittsburgh, PA
NWS Charleston, WV
NWS Fort Wayne, IN
NWS Grand Rapids, MI

All Ohio Radio and TV Stations
All Ohio Cable Systems

WOVK Radio, West Virginia

Ohio Association of Broadcasters (OAB)
Ohio SECC Chair
All Operational Area LECC Chairs
All Operational Area LECC Vice Chairs
Ohio SECC Cable Co-Chair
All Ohio County Sheriffs
President, All County Commissioners
Broadcast Educational Media Commission (BEMC)
Ohio Cable Telecommunications Association (OCTA)
Michigan Emergency Management Agency
Michigan SECC Chair
Indiana Emergency Management Agency
Indiana SECC Chair
Kentucky Emergency Management Agency
Kentucky SECC Chair
Pennsylvania Emergency Management Agency
Pennsylvania SECC Chair
West Virginia Emergency Management Agency
West Virginia SECC Chair

Attachment II: NOAA Weather Stations Serving Ohio Counties.....	13
Attachment III: Ohio EAS Operational Areas & Participating Stations and Cable Systems.....	14
Attachment IV: State Emergency Communications Committee.....	42

I. PURPOSE

This document provides procedures agreed upon by the broadcast and cable industry which will permit designated federal, state and local government officials to issue emergency information, instructions and warnings to the general public of Ohio by activating the State of Ohio Emergency Alert System (EAS) or any of the 12 Local Operational Area Systems.

II. AUTHORITY

47 CFR, Part 11, Federal Communications Commission (FCC) Rules and Regulations.

III. GENERAL INFORMATION

- A. The Ohio EAS will utilize digital message encoding/decoding equipment which complies with the standards in the FCC rules, Part 11, and is certified by the FCC.
- B. The Ohio EAS is made up of 12 Local Areas, also known as “Local Operational Areas.” This Plan was prepared by members of the Ohio State Emergency Communications Committee (SECC), in cooperation with the State of Ohio Emergency Management Agency (EMA) and the National Weather Service (NWS). The Plan provides background data and prescribes specific procedures for the broadcast and cable television media to disseminate emergency information and warnings to the general public throughout the State of Ohio, at the request of designated federal, state and local government officials, known as “Notifiers.” The State of Ohio EAS Plan may be activated on a day-to-day basis in response to such emergencies as: tornadoes, severe storms, flash floods, widespread fires, discharge of toxic chemicals or gases, nuclear incidents, widespread power failures, industrial explosions, civil disturbances, child abductions or any other occurrence, which poses an immediate threat to health, life, safety or property.
- C. The Plan provides for access to the EAS by designated officials working in conjunction with the State Primary (SP) station (WNCI-FM) and the Operational Area Local Primary (LP) EAS stations. The Plan also describes EAS access via the Integrated Public Alerting and Warning System (IPAWS). The State of Ohio EAS area consists of all Ohio’s 88 counties which are grouped into twelve Local Operational Areas. The Plan also envisions involvement of the broadcast media, as may be appropriate, in counties of Pennsylvania, Kentucky, Michigan, Indiana and West Virginia adjacent to the counties making up the Ohio EAS Local Operational Areas. This is a two-way involvement, providing for EAS messages originated by Ohio stations to be disseminated over stations in adjacent states which have Ohio coverage, and for EAS messages originated by stations in adjacent states to be disseminated over Ohio stations having coverage in those adjacent states.
- D. Acceptance of or participation in this Plan shall not be deemed to prohibit a broadcast licensee or cable TV operator from exercising independent discretion and responsibility in any given situation. Stations originating EAS emergency communications shall be deemed to have conferred rebroadcast authority.
- E. The twelve Ohio Local Operational Area EAS Plans are revised and updated independently of the State EAS Plan.
- F. The following are the FCC designations reflecting the EAS status of every broadcaster and cable operator. Consult Attachment III (Ohio EAS Operational Areas & Participating Stations) to this Plan to determine each station’s EAS designation.

NP (National Primary) Stations – Sole source of national EAS alerts. In Ohio, WTAM and WLW are NP stations. These stations will feed national level alerts to the State Primary (SP-1) WNCI and Alternate State Primary (SP-2) WBNS-FM.

SP (State Primary) – The entry point for statewide Ohio EAS announcements. WNCI, Columbus, serves as the State Primary station. The Alternate State Primary station is WBNS-FM.

LP-1 and LP-2 (Local Primary) – EAS entry point stations for activating the EAS in each operational area. There are at least two in each area. The LP-1 is the primary Local Primary station. The LP-2 is the Alternate Local Primary station. LP 1 and 2 stations are to be monitored by all participating stations in the area.

LP-3 (Local Primary 3) – LP-3 stations are designated in some areas to bridge operational areas. LP-3 stations also serve as monitoring points for stations that cannot pick up a signal from an LP-1 or LP-2.

PN (Participating National) – All broadcasters and cable operators are designated as PN. They monitor the area LP stations and deliver EAS alerts directly to the general public.

IV. OHIO EAS CONFIGURATION

The Ohio EAS is a fully automated system allowing Notifiers through dedicated encoders to selectively provide Ohio citizens with timely emergency information and warnings. This State Plan outlines general guidelines for EAS configuration, activation and use, and state activation procedures. Local area notification procedures are outlined in the twelve (12) Ohio Local Operational Area EAS Plans.

Notifiers must have EAS encoder equipment. Notifiers without EAS equipment must activate the EAS through a Notifier with the proper EAS encoder. LP stations serve as the primary contact point for EAS entry and therefore, carry an extra EAS responsibility.

The process of selecting monitoring assignments in the Ohio EAS structure was based on station coverage areas with an emphasis on the ability to span state, local area and county boundaries. This focus provides Ohio with an approach for disseminating EAS messages over all stations and cable systems with coverage serving an impacted area, regardless of the physical location of the transmitter or cable head-end equipment. To achieve this capability, cross monitoring and multiple Local Primary (LP) monitoring assignments are required. While this monitoring scheme creates some additional burden on LP stations in hardware procurement and configuration, the benefits of specific and thorough coverage far outweighs these burdens.

The ability to fully utilize the automated technology of the EAS to assure 24-hour system reliability and selective signaling was key to the setting of our Ohio EAS goal. Throughout the long-range development of the Ohio EAS, emphasis will be placed on configuring a fully automated but interruptible system. Emphasis will be placed on Notifiers having EAS encoders and on the reliable interface of the National Weather Service's Specific Area Message Encoder (SAME) into the Ohio EAS structure. Ohio EAS monitoring assignments specify the monitoring of the Operational Area LP-1 and LP-2 stations by all broadcasters and cable operators and strongly recommend that all broadcasters and cable operators monitor the NOAA weather radio station issuing weather warnings for counties within their coverage area. The approval to monitor a LP-3 station is granted when difficulties are encountered in receiving a LP-1 or LP-2 station.

V. ORIGINATING STATIONS

- A. The State of Ohio EAS's originating station is WNCI (FM), Columbus, Ohio (97.9 MHz), designated the State Primary (SP-1) station. The State of Ohio EAS's alternate originating station is WBNS-FM, Columbus, Ohio (97.1 MHz), designated the Alternate State Primary station (SP-2). If WNCI cannot be contacted, WBNS should be notified and requested to activate the State of Ohio EAS.
- B. In the case of localized emergency situations not involving the entire state, state level Notifiers may request activation of the EAS on a local operational area basis through the local area Local Primary (LP) stations serving the affected area.

VI. EAS MESSAGE PROTOCOL

- A. The EAS system uses a four-part message structure for emergency activation. The four parts are: (1) The preamble and EAS header codes; (2) The audio attention signal; (3) The EAS message audio text; and, (4) The preamble and end-of-message code. The description of the protocol that follows is provided for informational purposes only. The actual generation of EAS messages is accomplished through the use of FCC-accepted EAS encoder/decoder equipment. EAS encoder/decoder equipment software generates the header and end-of-message codes using plain English entries, through menu prompts.

The FCC protocol is as follows:

- 1. **The Preamble and EAS Header** – The preamble and EAS header code contains specific information related to the origination, handling and routing of the EAS message. An EAS encoder transmits the code three times with a one-second pause between transmissions.

The originator code part of this header is pre-set once by the user. The code is then sent automatically by the encoder as part of each message activation. The following originator codes will be used as part of the Ohio EAS:

<u>Originator</u>	<u>Code</u>
Broadcast station or cable system	EAS
Civil authorities	CIV
National Weather Service	WXR
Primary Entry Point system	PEP (national use only)

Within the EAS header is an eight-character identification code. These eight-characters identify the broadcaster, cable operator, NWS office, or civil authority transmitting or retransmitting the message. Once programmed, the EAS encoder will automatically affix this code to outgoing EAS messages. Identification codes in Ohio will follow the convention shown in the examples below, except for cable system codes which may vary:

WHBCAMFM	Broadcast station combo (<i>Example: WHBC AM/FM</i>)
WHBCFM	Single broadcast station (<i>Example: WHBC-FM</i>)
WLWAM	Single broadcast station (<i>Example: WLW-AM</i>)
NWS/KCLE	NWS, NOAA weather radio
STARCOEM	County Emergency Management (<i>Example: Stark County</i>)
STARCOSO	County Sheriff (<i>Example: Stark County</i>)
OHIOSTEM	State Emergency Operations Center/Emergency Management Agency
CLEVOH11	Cable System (<i>Example: AT&T, Cleveland – Location #11</i>)

Other suggested identification codes should be submitted to the SECC for approval and inclusion in the State and Local Operational area EAS Plans. Identification codes for county originators can be found in the Local Operational Area EAS Plans.

2. **Audio Attention Signal** – The audio attention signal is a two-tone signal transmitted after the EAS header code. This signal is 8 seconds in duration and serves to alert listeners to an upcoming emergency broadcast.
 3. **EAS Message Text** – The EAS message text is the actual text of the emergency message to be transmitted. All Ohio statewide EAS messages will begin with the statement: “WE INTERRUPT THIS PROGRAM TO ACTIVATE THE EMERGENCY ALERT SYSTEM” and end with the statement: “THIS CONCLUDES THIS EMERGENCY ALERT SYSTEM MESSAGE.” This audio message – including open, close and body – must be limited to two minutes in order to fit within the recording space provided in the EAS encoder/decoder.
 4. **End of Message Code** – The end-of-message-code is transmitted by the encoder three times with one second pauses between transmissions. Its purpose is to return automated broadcast programming equipment to normal programming after an EAS interruption.
- B. The EAS Message Protocol described above is taken from the FCC Rules, Part 11, and shall be used exclusively by the Ohio EAS System. Each participating station and subject cable system and Notifier in the state should program their EAS decoder to facilitate the proper functioning of the system as described in this State Plan and the 12 Local Operational Area EAS Plans.
- C. **Ohio EAS Event Codes:** Whether used under the authority of the Ohio State EAS Plan, or any of the 12 Local Operational Area EAS Plans, the following are the only EAS Event Codes to be used in Ohio by anyone for any purpose. No codes can be added without SECC/FCC approval. This list will be maintained as a “Master List” for all event codes used in the State of Ohio.

Warning Codes – These are codes critical to the rapid dissemination of emergency information. This entire list must be programmed into your EAS encoder/decoder.

Emergency Action Notification	EAN
Emergency Action Termination	EAT
Required Monthly Test	RMT
Required Weekly Test	RWT
Child Abduction Emergency	CAE
Civil Danger Warning	CDW
Civil Emergency Message	CEM
Earthquake Warning	EQW
Evacuation Immediate	EVI
Fire Warning	FRW
Flash Flood Warning	FFW
Hazardous Materials Warning	HMW
Law Enforcement Warning	LEW
National Information Center	NIC
National Periodic Test	NPT
9-1-1 Telephone Outage Emergency	TOE
Nuclear Power Plant Warning	NUW
Radiological Hazard Warning	RHW
Shelter In Place Warning	SPW
Tornado Warning	TOR

Optional Codes – These codes are authorized for use by station on an as needed or optional basis. The programming of these codes into station EAS equipment is at the discretion of each EAS station.

Administrative Message	ADR
Blizzard Warning	BZW
Blue Alert	BLU
Extreme Wind Warning	EWV
Flash Flood Watch	FFA
Flash Flood Statement	FFS
Flood Warning	FLW
Flood Watch	FLA
Flood Statement	FLS
High Wind Warning	HWW
High Wind Watch	HWA
Network Message Notification	NMN
Practice/Demo Warning	DMO
Severe Thunderstorm Warning	SVR
Severe Thunderstorm Watch	SVA
Severe Weather Statement	SVS
Special Marine Warning	SNW
Special Weather Statement	SPS
Tornado Watch	TOA
Winter Storm Warning	WSW
Winter Storm Watch	WSA

VII. MONITORING ASSIGNMENTS

- A. As indicated in Section V, WNCI is the State Primary station and will be the originator for State of Ohio EAS messages. WBNS-FM, the Alternate State Primary station, will serve as the alternate originator for the State of Ohio EAS and will monitor WNCI. Local Primary stations will monitor other LP stations as shown on the LP Monitoring Assignments and Map (Attachment I).
- B. All participating (PN) State of Ohio broadcast stations and subject cable systems shall monitor the LP-1 and LP-2 stations serving their local operational area, unless specified otherwise in the Local Operational Area EAS Plan. LP-3 stations have been designated in some operational areas to ensure signal coverage throughout the operational area. Broadcast stations and cable systems in operational areas where an LP-3 has been designated are expected to monitor the LP-3 if reception of the LP-1 or LP-2 is unreliable.
- C. In addition to their assigned LP stations, all stations and cable systems participating in the Ohio EAS are encouraged to monitor the appropriate NOAA weather radio station serving their area. This is particularly important for LP stations. A complete list of NOAA weather stations and the counties for which they provide weather warnings is provided in Attachment II.
- D. Details on specific monitoring assignments for Ohio EAS participating stations and cable systems are outlined in the 12 Local Operational Area Plans. If monitoring difficulties are experienced, the operational area chair should be consulted in resolving the problem. The operational area chairs will coordinate any waiver necessary with the SECC chair and the FCC.

VIII. RESPONSIBILITIES OF LOCAL PRIMARY STATIONS

- A. Local Primary (LP) stations serving the Ohio EAS System are chosen on the basis of signal coverage and their ability and willingness to serve in this important key capacity. LP stations are required to operate 24 hours per day and preferably be attended operations.
- B. In accepting this Plan, all LP stations agree to transmit any EAS messages requested by official EAS Notifiers identified in this and their Local Operational Area EAS Plan. To do this, LP stations must install telephone coupler equipment for use in providing Notifier access. Additionally, LP stations, as they deem necessary, agree to re-transmit any received message carrying any of the warning event codes specified in Section VI C, which are originated in their or any adjoining local operational areas. This will ensure message dissemination through all broadcast and cable media, which may have listeners, viewers or subscribers in the area affected by the emergency. This will require effort and attention to detail in EAS decoder programming, station operational planning and staff training. LP station engineers or other responsible personnel should consult their local operational area chair, adjoining area chairs and the state chair in coordinating this important function.
- C. LP stations must program their EAS decoders to accept emergency messages carrying location codes for all counties which are covered, in whole or in part, by any station or cable system in their local operational area. All other participating stations must program their EAS encoders to accept emergency messages carrying location codes for all counties, which are covered, in whole or in part, by their secondary coverage contour.

IX. CAP-BASED EAS ACCESS

Ohio has two delivery systems in place to distribute alerts digitally.

- A. The State of Ohio Emergency Operations Center/Joint Dispatch Facility (EOC/JDF), which houses the Ohio EMA, the State Emergency Operations Center (EOC), and a State Highway Patrol Dispatch Center, is fully certified and capable of originating approved EAS event codes via IPAWS, which are distributed to participating Ohio stations using FCC-approved EAS decoders via the federal IPAWS Common Alerting Protocol (CAP) server. The Ohio EAS Plan requires conducting a minimum of four statewide RMT event code tests annually via IPAWS.
- B. The State of Ohio EOC/JDF also has an IPAWS aggregator linked via secured fiber to a series of public television stations across the state. The Ohio Digital Emergency Alert System (OEAS) provides a redundant CAP-based network to transport EAS alerts within Ohio public television station ATSC signals. All LP, SP, and NP stations across the state have ATSC receivers connected to CAP decoders that monitor these public television stations and forward received alerts to their respective operational areas via over-the-air transmission. The Ohio EAS Plan requires conducting a minimum of four statewide RMT event code tests annually via the OEAS CAP network.

X. NOTIFICATION PROCEDURES

- A. **Notifiers:** The agencies named below shall serve as Notifiers for the State of Ohio EAS. Other agencies may request activation of the State of Ohio EAS, but they must do so through one of the Notifiers listed below:
 - 1. Governor of the State of Ohio
 - 2. Ohio Emergency Management Agency
 - 3. Ohio State Highway Patrol
 - 4. National Weather Service (weather alerts only)

5. County Emergency Management Agency Directors (local operational area only)
6. County Sheriffs (local operational area only)

- B. Request for Activation of a Statewide Alert:** Notification of a statewide alert can be accomplished by sending the pre-formatted alert from the EOC/JDF using an EAS encoder to the State Primary or Alternate State Primary station. The EOC/JDF houses the offices of the Ohio EMA and the Ohio State Highway Patrol Dispatch Center. This facility serves as the EAS notification point and is connected to the State Primary station by a private radio link.
- C. Requests for Activation of a Local Operational Area Alert:** Requests for activation of an alert within a local operational area can be made by sending the preformatted alert from an authorized Notifier using an EAS encoder to the Local Primary 1 or Local Primary 2 station for the operational area.

Notifiers with IPAWS capability may send alerts for their county via IPAWS, and regional IPAWS alert origination may be coordinated through the Ohio EMA. Local activation will be accomplished in accordance with the procedures outlined in the 12 Local Operational Area EAS Plans. Ohio EAS messages will be formatted to begin with the following statement: "WE INTERRUPT THIS PROGRAM TO ACTIVATE THE EMERGENCY ALERT SYSTEM (text of emergency message)." Message will end with the following statement: "THIS CONCLUDES THIS EMERGENCY ALERT SYSTEM MESSAGE."

- D. Weather Alerts:** The National Weather Service (NWS) will serve as the sole Notifier for all weather alerts and subsequent weather information. The primary means of NWS activation of the Ohio EAS will be over NWS-Specific Area Message Encoder (SAME) through station monitoring of the NOAA weather radio system.

XI. BROADCASTER AND CABLE OPERATOR PROCEDURES

- A. Upon receipt of a pre-formatted EAS alert from an authorized Notifier, the SP or alternate SP station shall re-transmit that alert immediately. The exception is Practice/Demo Warnings (DMOs) which should not be re-transmitted.
- B. All broadcast stations and cable systems in the State of Ohio monitoring the relevant LP stations will be alerted by their EAS decoders based on the event and location codes contained in the EAS digital header. Upon receipt of a valid EAS message, each station or cable system should broadcast the information contained in the message within 15 minutes of receipt. (See requirements in Section XII.)
- C. All messages must be based on definite and confirmed facts. This can best be assured by using the Notifier's original audio message as transmitted through the EAS decoder/encoder equipment. Discussion of unconfirmed facts can lead to public confusion and heightened anxiety.
- D. Upon completion of the EAS transmission, appropriate notations must be entered into the station log.

XII. LEGAL MATTERS

- A. As a reminder to broadcasters and cable operators, the following legal points are made regarding emergency alert operations. (For complete information, consult FCC Rules and Regulations, Part 11.)
- B. While the broadcast of EAS messages is encouraged, use of Ohio EAS material is solely up to the discretion of individual station or cable system management. Although the activation of the EAS is

discretionary at the state and local levels, if it is activated, all communications facilities within the affected area that are participating in the EAS at the state or local level are expected to take part in the activation and to follow the requirements of the FCC's rules, the EAS Operating Handbook, and the State and Local Operational Area EAS Plans. (See FCC Rules, Part 11, Secs. 11.21, 11.41 and 11.55.)

- C. All participating stations and cable systems have permission to rebroadcast Ohio EAS messages. Such rebroadcast permission begins with issuance of the EAS signaling and alert tones, and ends with the EAS end-of-message code. Stations and cable systems are encouraged to configure their EAS encoders for automatic relay of EAS messages. Unattended stations must operate EAS encoders in automatic mode.
- D. In the event of EAS activation, stations with certain power, pattern and operating hours limitations may forego those limitations subject to FCC Rules and Regulations.
- E. In accordance with the guidance provided in a Public Notice issued by the FCC, *Public Safety and Homeland Security Bureau Informs State Emergency Communications Committees How to Prepare and File Summaries of Multilingual EAS Activity Received from EAS Participants*, Public Notice, DA 18-358, EB Docket 04-296 (Apr. 11, 2018) ("FCC 2018 PN"), the SECC compiled information submitted by EAS broadcast and cable participants regarding their current and future actions to provide emergency alert content to the non-English speaking public in languages other than English "to ensure that the Commission has sufficient and accurate information on any existing and planned activities by EAS Participants to provide EAS alert content in languages other than English to their non-English speaking audiences."

Pursuant to Section 11.21(e), the SECC submitted the following information to the FCC on May 4, 2018:

- The SECC received responses from nearly Ohio 550 EAS participants.
- Less than 1% of EAS participant respondents are currently providing EAS alerts in a language other than English. In all cases, that language was Spanish.
- Less than 1% of EAS participant respondents indicated that they are planning, in the future, to provide EAS alerts in a language other than English.
- More than 99% of EAS participant respondents neither currently provide nor plan to provide in the near future EAS alerts in a language other than English.

The SECC also received feedback from EAS participants that any effort to establish expectations for multi-lingual alerting must address criteria and guidelines for the generation and transmission of non-English alerts.

XIII. STEPS BROADCASTERS AND CABLE OPERATORS MUST TAKE TO PARTICIPATE IN THE OHIO EMERGENCY ALERT SYSTEM

- A. The Ohio State Emergency Communications Committee (SECC) has set the following requirements for participation in the Ohio EAS Plan. The success of the Ohio EAS will depend totally on operating staff readiness, equipment configuration and adherence to these steps.
- B. All stations and cable systems must have an EAS encoder/decoder installed with audio inputs from the LP-1 and LP-2 stations serving their Local Operational Area. In addition, input from a NWS weather radio source is strongly encouraged.

- C. The following encoder/decoder programming must be accomplished in order to participate in the Plan:

For Radio and TV Stations – Decoders must be programmed to accept alerts using all the warning event codes given in Section VI C, at a minimum. Decoders must also be programmed to accept alerts containing all county location codes within their secondary coverage contour. The EAS station specification sheets found in the Local Operational Area EAS Plan should be used as a guide. TV stations must transmit all received alerts in accordance with FCC Rules 11.51 (d).

For Cable System Head Ends – Decoders must be programmed to accept alerts for all warning event codes given in Section VI, C. Decoders must be programmed to accept alerts containing county location codes for all counties covered, in whole or in part, by the system. Cable systems must transmit all received alerts in accordance with FCC Rules in Par. 11.51 (g) and 11.51 (h).

EAS equipment should be configured to notify station personnel of any EAS activation. LP stations must program their decoders for additional location codes as prescribed in this Plan. Unless a facility is attended 24 hours by operators trained in EAS operation, encoder/decoder equipment should be configured to automatically rebroadcast properly addressed EAS messages.

NOTE: The SECC recognizes the problems encountered in large cable systems, where selective delivery to specific areas may not be possible, resulting in alerts being received by subscribers, who may not be affected by the alert. However, the SECC expects that all alerts be sent. The information contained in the alert itself is sufficient to allow subscribers to determine if the alert applies to them.

- D. Each station and cable system is unique in the role that it plays in the EAS system. Operating personnel are expected to consult their Local Operational Area EAS Plan and confer with the chairperson of the local operational area on the specific details and requirements for fulfilling their EAS requirements.
- E. Stations and cable systems should, based on this Plan and their Local Operational Area EAS Plan, develop their own standard operating procedures. Station personnel should post those procedures at the EAS equipment for quick reference. A copy of this Plan alone is not adequate for operating personnel to use as a guide at the time of activation, nor can operating personnel be expected to remember what to do after studying this Plan. This Plan must be applied to each facility. Therefore a clear, concise step-by-step operating procedure, readily available, for operating personnel to use at the time of an emergency, is absolutely necessary if the EAS is to be successful.
- F. The State EAS has both audio and video capabilities. Television stations and cable systems participating in the Ohio EAS should have systems configured at all times to air the EAS message crawler as well as audio during EAS messages. All participating stations and cable systems are encouraged to purchase EAS equipment with multiple monitoring capabilities. This should include at a minimum the ability to monitor two over-the-air broadcast stations plus a NOAA weather radio station. LP station equipment should also allow for the telephone interface of Notifiers' encoders or the interface of existing remote pickup unit equipment, if appropriate. LP stations should pay particular attention to their multiple monitoring responsibilities when selecting EAS equipment.

XIV. TEST PROCEDURES

- A. EAS weekly tests of the EAS header and end-of-message codes must be conducted by all stations and cable systems in accordance with FCC Rules. This is known as the Required Weekly Test (RWT).

- B. Monthly tests of the EAS system, known as Required Monthly Tests (RMTs), will be conducted on a statewide basis in accordance with FCC rules and regulations. The Ohio Emergency Operations Center will originate all RMTs on the following schedule:

<i>Month</i>	<i>Day</i>	<i>Time Frame</i>	<i>Time</i>	<i>Relay Station</i>
January	2 nd Wed.	Daytime / 8:30A.M. to Local Sunset	9:50 a.m.	SP/LP-1
February	2 nd Wed.	Nighttime / Local Sunset to 8:30A.M.	3:50 a.m.	SP/LP-2
March	1 st Wed. *	Daytime /Severe Wx Awareness	9:50 a.m.	SP/LP-1
April	2 nd Wed.	Nighttime / Local Sunset to 8:30A.M.	3:50 a.m.	SP/LP-1
May	2 nd Wed.	Daytime / 8:30 AM to Local Sunset	9:50 a.m.	SP/LP-2
June	2 nd Wed.	Nighttime / Local Sunset to 8:30A.M.	3:50 a.m.	SP/LP-2
July	2 nd Wed.	Daytime / 8:30 AM to Local Sunset	9:50 a.m.	SP/LP-1
August	2 nd Wed.	Nighttime / Local Sunset to 8:30A.M.	3:50 a.m.	SP/LP-1
September	2 nd Wed.	Daytime / 8:30 AM to Local Sunset	9:50 a.m.	SP/LP-2
October	2 nd Wed.	Nighttime / Local Sunset to 8:30A.M.	3:50 a.m.	SP/LP-1
November	2 nd Wed.	Daytime / 8:30 AM to Local Sunset	9:50 a.m.	SP/LP-1
December	2 nd Wed.	Nighttime / Local Sunset to 8:30A.M.	3:50 a.m.	SP/LP-2

* The March test will be conducted on the first Wednesday of the month at 9:50 a.m., or in conjunction with the Ohio's "Severe Weather Awareness Week" activities.

The SP station will forward the RMT to LP stations to relay to monitoring stations and cable systems within their operational areas. All RMTs must be re-transmitted within 60 minutes of receipt by participating EAS stations and cable systems.

A minimum of four RMTs will be conducted annually via IPAWS, and a minimum of four RMTs will be conducted annually across the OEAS CAP aggregator and the public television network.

- C. The following script will be used for statewide RMTs:

"THIS IS A STATEWIDE TEST OF THE OHIO EMERGENCY ALERT SYSTEM, ORIGINATING FROM THE STATE EMERGENCY OPERATIONS CENTER IN COLUMBUS. THIS IS ONLY A TEST. THE OHIO EMERGENCY ALERT SYSTEM HAS BEEN DESIGNED TO PROVIDE THE PUBLIC WITH TIMELY WARNINGS AND EMERGENCY INFORMATION. HAD THIS BEEN AN ACTUAL EMERGENCY, YOU WOULD HAVE RECEIVED INSTRUCTIONS AND INFORMATION RELATED TO THAT EMERGENCY OVER THIS AND OTHER STATIONS IN YOUR AREA. THIS CONCLUDES THIS STATEWIDE TEST OF THE OHIO EMERGENCY ALERT SYSTEM."

XV. STATE AND LOCAL EMERGENCY COMMUNICATIONS COMMITTEES

- A. The SECC is comprised of the SECC Chair, Vice Chair, the Cable Co-Chair, LECC Chairs and Vice Chairs, and other voluntary members appointed by the SECC Chair.
- B. The Local Emergency Communications Committee (LECC) Chairs and Vice Chairs are appointed by the SECC Chair. The LECCs are also subcommittees of the SECC and all LECC Chairs and Vice Chairs are members of the SECC.

C. Your SECC and LECC Chairs and Vice Chairs welcome your questions and comments concerning this Plan. A complete listing of the SECC members, including LECC Chairs and Vice Chairs, is found in Attachment IV.

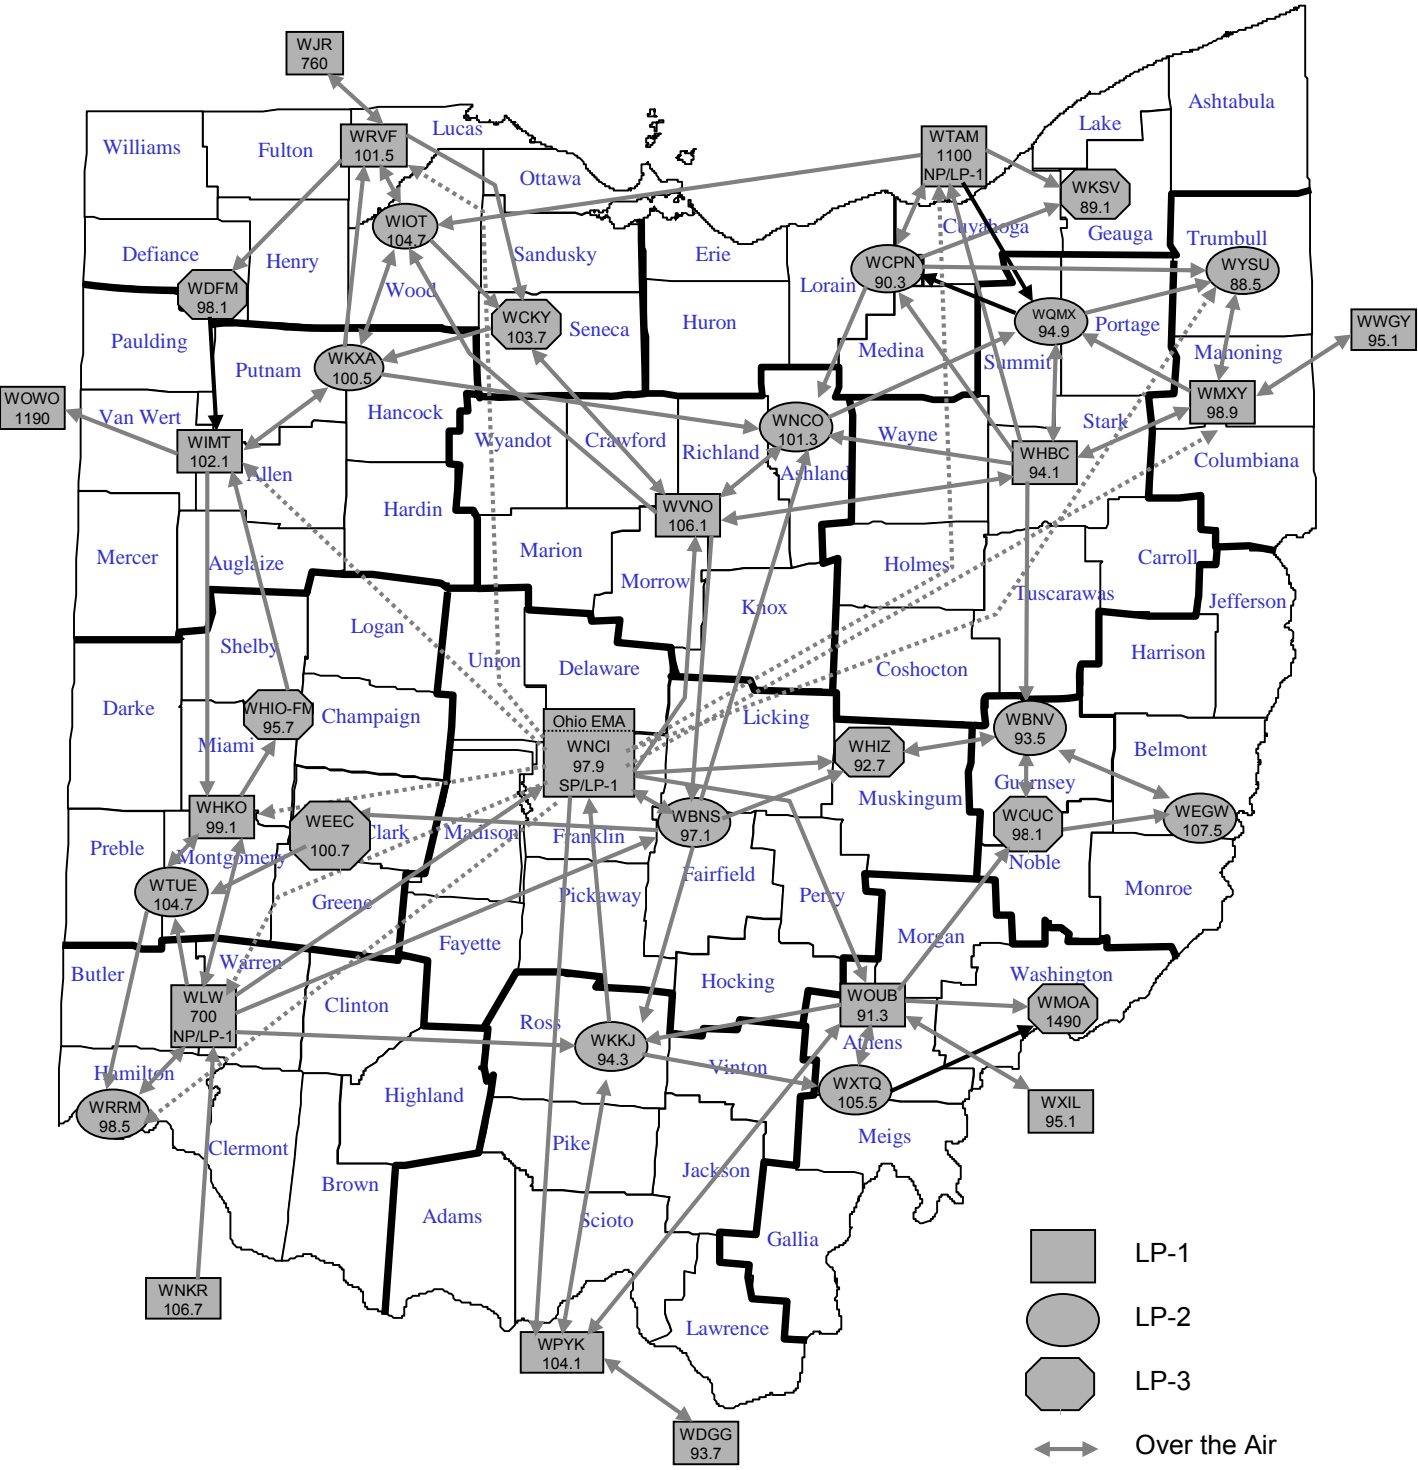

XVI. ACRONYMS

The following acronyms have been referenced in this Plan:

CAP	Common Alerting Protocol
EAS	Emergency Alert System
EMA	Emergency Management Agency
EOC	Emergency Operations Center
EOC/JDF	Emergency Operations Center/Joint Dispatch Facility
FCC	Federal Communications Commission
IPAWS	Integrated Public Alert and Warning System
LP-1	Local Primary Station
LP-2	Local Primary Station, alternate
LP-3	Local Primary Station, alternate, relay
LECC	Local Emergency Communications Committee
NOAA	National Oceanic and Atmospheric Administration
NP	National Primary Station
NWS	National Weather Service
OEAS	Ohio (Digital) Emergency Alert System
RMT	Required Monthly Test
RPU	Remote Pickup Unit
RWT	Required Weekly Test
SAME	Specific Area Message Encoding
SECC	State Emergency Communications Committee
SP-1	State Primary Station
SP-2	State Primary, alternate

ATTACHMENT I

LP STATION MONITORING ASSIGNMENTS AND MAP

ATTACHMENT II

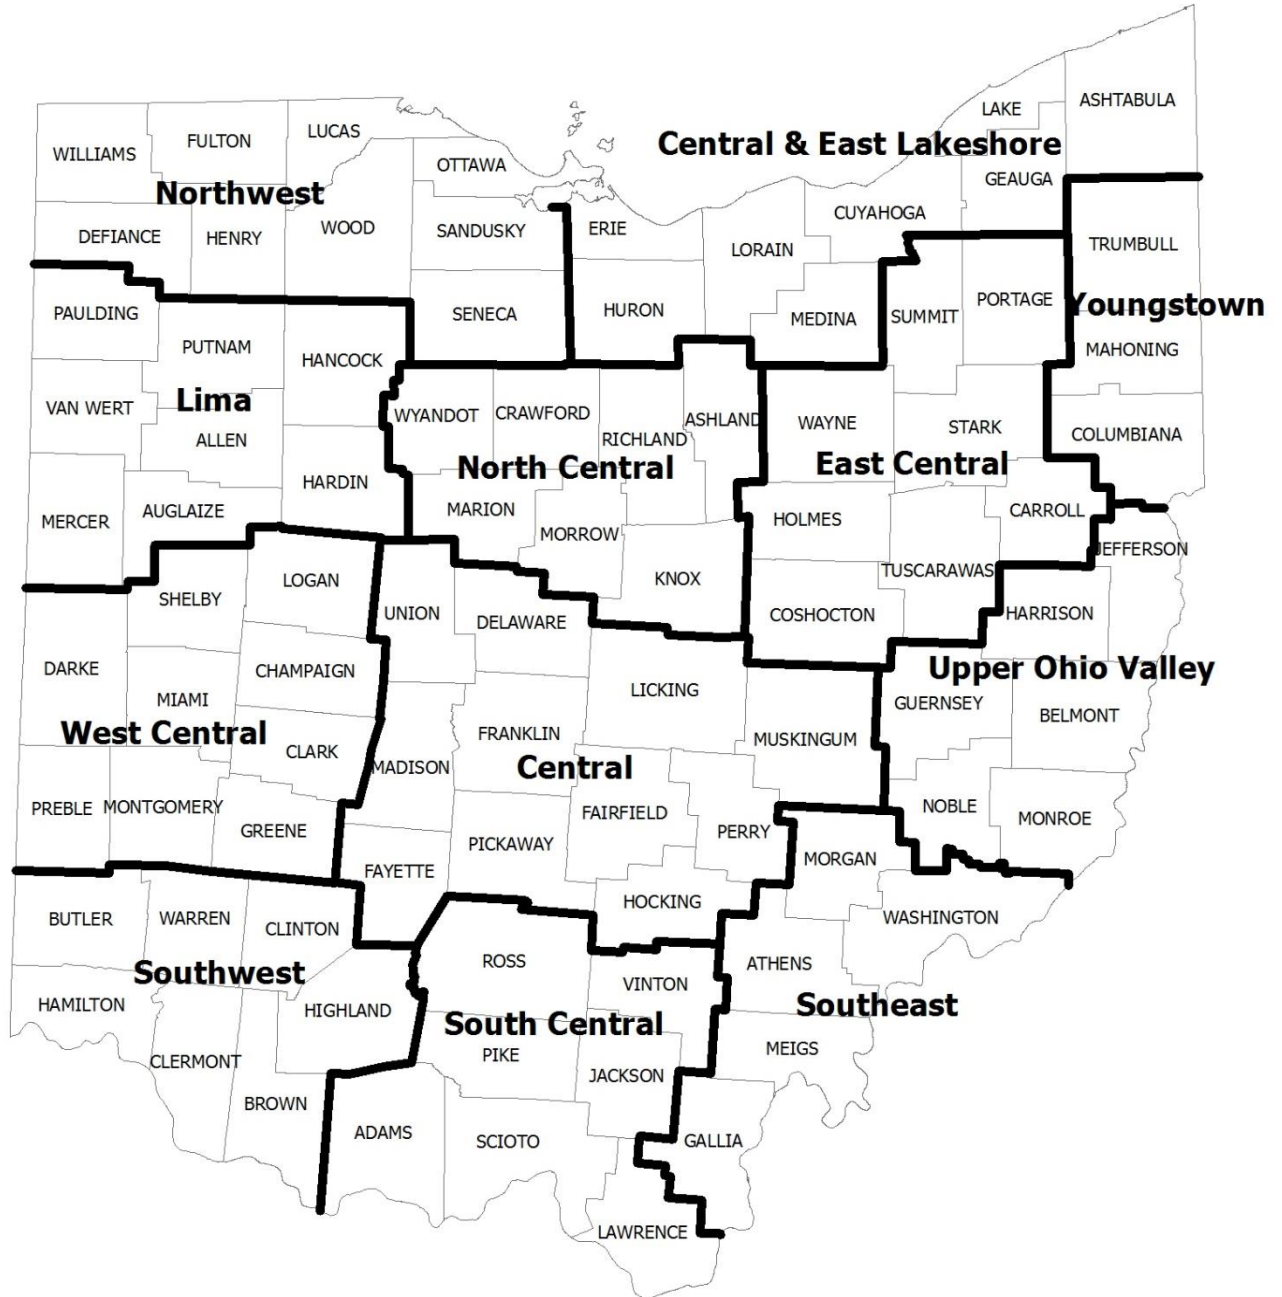

NOAA WEATHER STATIONS SERVING OHIO COUNTIES

The following is a list of all NOAA weather station outlets serving Ohio points along with counties for which SAME encoded warnings will be carried. Warnings for some counties are carried on more than one station.

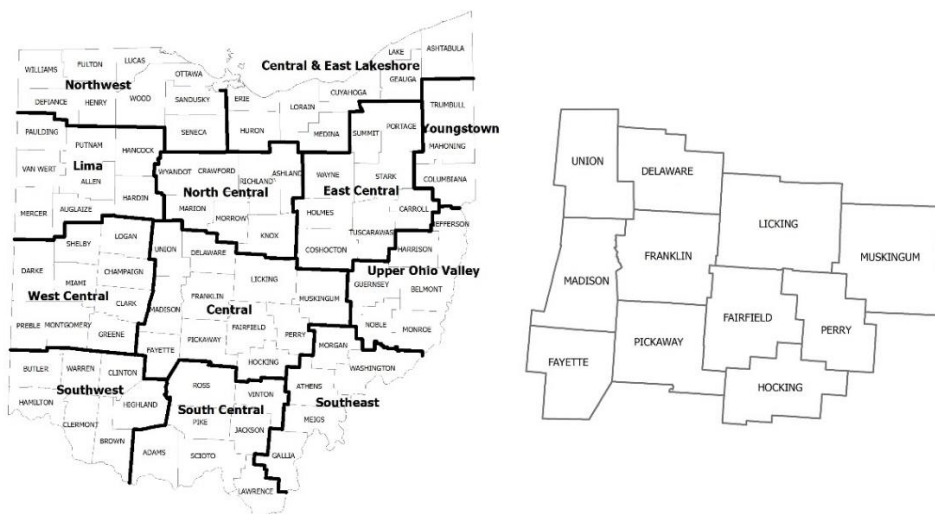

<u>City</u>	<u>Call Sign</u>	<u>Radar Site</u>	<u>Frequency</u>	<u>Counties</u>
Akron	KDO-94		162.40	Ashland, Carroll, Columbiana, Harrison, Holmes, Jefferson, Mahoning, Medina, Portage, Summit, Trumbull, Tuscarawas, Wayne, Stark
