DISCLAIMERS

Past Performance

Performance shown is past performance and is no guarantee of future results. Future returns could be higher or lower. Investment values will fluctuate, and security positions, when sold, may be worth more or less than their original cost.

Private Equity

The fair value for all private equity funds shall reflect the most recent valuation provided by the manager or fund sponsor ("Provided Valuation"), adjusted for capital calls and distributions after the date of the Provided Valuation. The Provided Valuation is typically the value of the fund as of the prior quarter's end and in some instances, it may be from two or more prior quarter's end. If no subsequent valuation post-purchase is provided by the manager or fund sponsor, then the Provided Valuation shall reflect the initial purchase price. The fair value of a private equity fund determined hereunder could be **significantly more or less** than original purchase price. The client's advisory fee shall be based upon the fund's fair value as determined hereunder.

Hatteras Funds

Performance and values for Hatteras Core Alternatives Fund LP and Hatteras Core Alternatives TEI Fund LP may be as of the end of the previous month.

Cash Returns

Unusual returns for the Cash asset class are due to the timing of interest payments relative to the balance that exists in the cash account on any given day. For example, a temporarily high cash balance may earn an interest payment that later becomes a very large percentage of a much smaller balance when interest is paid at month end. These high percentages do not impact the portfolio return, as only the dollar value of interest paid is reflected in the portfolio return calculation.

REPORT TERMS

Account Return (Gross)

Percentage performance is shown gross of fees (before deduction of Budros, Ruhlin & Roe, Inc. investment management or wealth management fees).

Account Return (Net)

Percentage performance is shown net of fees (after deduction of only those Budros, Ruhlin & Roe, Inc. investment management or wealth management fees which have been directly deducted from your investment accounts; fees paid by check are not reflected in this calculation).

Accrued Interest and Dividends

Interest and Dividends that have been accumulated since the last pay date, but have not yet been paid.

Beginning/Ending Value

The total value of all investments in your Investment Accounts at the beginning or end of the period, including the market values of securities, cash and money funds, and accrued interest on bonds. Values of separate, designated Cash Accounts are not included in these total values.

Capital Appreciation

The gain or loss on the portfolio or individual investment.

Cumulative Net Investment

Deposits minus withdrawals of cash and securities, from portfolio inception date.

Internal Rate of Return (IRR) – see also Time Weighted Rate of Return (TWR)

A measure of the growth of the portfolio or investment, taking into account market performance and the timing of when you deposited or withdrew cash or securities. IRR is meant to answer the question, "How did I, the investor, do?"

Investment Gain/(Loss)

The sum of all interest and dividend income, plus capital gain or loss, less investment fees, to arrive at the amount of change in portfolio value for the specific period of time.

Net Contribution

Deposits minus withdrawals of cash and securities.

Net Income

Dividends and interest earned, minus expenses charged against the portfolio, including Budros, Ruhlin & Roe, Inc. investment or wealth management fees deducted from one or more portfolio accounts.

Time Weighed Rate of Return (TWR) – see also Internal Rate of Return (IRR)

A measure of the growth of the portfolio or investment in terms that remove the effect of the timing and size of capital flows. TWR is meant to answer the question, "How did my investment manager do?"
